The Problem

Apply blindly

No idea if their resume matches the role

ATS is invisible

Rejected by bots before a human reads their CV

No feedback loop

Rejections come with zero explanation

Unclear skill gaps

Don't know what to learn to become job-ready

Interview anxiety

No structured preparation guidance

Wasted time

Apply to 100 jobs, hear back from none

Who We're Building For

Final-Year Engineering Students

Need a job offer before graduation. Don't know if their resume is ready.

Fresh Graduates

Entering the market for the first time.
Overwhelmed by rejections.

Entry-Level Job Seekers

0–2 years experience. Struggling to stand out in competitive markets.

Our Solution

CareerPilot AI

A complete AI-powered employability engine that evaluates job readiness, reveals skill gaps, and builds a personalized action plan — before you hit Apply.

Measure

Career Readiness Report

Career Twin Analysis

AI Career Assistant

Core Features

Resume Parser

- Extract Skills & Education
- Projects & Experience
- Structured JSON Output

Job Match Analysis

- Match Score (0–100%)
- Matched vs Missing Skills
- Keyword Overlap

ATS Evaluation

- ATS Score
- Missing Keywords
- Resume Suggestions

Skill Gap Analysis

- Missing Technologies
- Priority Ranking

Learning Roadmap

- 30-Day Plan
- Weekly Milestones

Interview Prep

- Technical Questions
- HR + Project-Based Qs

Career Readiness Report

- Readiness + Match + ATS Score
- Actionable Recommendations

Career Twin Analysis

- Current Level → Target Role
- Missing Competencies

How AI Powers CareerPilot

Powered by Google Gemini API

Resume Intelligence

Extracts skills, experience, projects, education from unstructured PDF text

Job Match Scoring

Compares resume entities against JD requirements, scores alignment 0–100%

ATS Simulation

Detects missing keywords, formats, and ATS-unfriendly patterns

Skill Gap Detection

Cross-references industry skill databases to rank missing competencies by priority

Roadmap Generation

Produces weekly, milestone-based 30-day learning plans tailored to the gap

Interview Q Generation

Generates role-specific technical, HR, and project questions from JD + resume

Measurable Outputs

Every analysis produces real, quantifiable results — not vague suggestions.

Quantified Scores	✗	✓
ATS Evaluation	✗	✓
Skill Gap Analysis	✗	✓
Learning Roadmap	✗	✓
Interview Pack	✗	✓
Actionable Next Steps	✗	✓

CareerPilot AI is a complete employability platform, not just a Q&A bot.

Expected Impact

Apply Smarter

Know your match score before applying. Stop wasting time on roles you're not ready for.

Improve Faster

A 30-day roadmap tells you exactly what to learn — no more Googling 'what skills for SDE'.

Beat the ATS

Know exactly which keywords are missing from your resume before submission.

Interview Ready

Walk in with a role-specific question bank built from the actual JD.

Confidence Boost

Students apply with data-backed confidence, not guesswork.

Track Progress

See how your scores improve as you add skills and update your resume.

Future Roadmap

Phase 1

Now (Hackathon)

- Resume Parser
- Job Match & ATS Scores
- Skill Gap + Roadmap
- Interview Prep Pack

Phase 2

Next 3 Months

- LinkedIn Integration
- GitHub Profile Analysis
- Resume Auto-Improve
- Multi-JD Comparison

Phase 3

6 Months+

- Voice Mock Interviews
- Job Recommendation Engine
- Personalized Career Tracking
- Company-Specific Prep Packs
